Get Certified to Install the SolarEdge Energy Bank Today!

Step 1: Make sure you have a SolarEdge Monitoring Portal account.
Don't have an account? Reach out to your company's admin to be added as a user. A quick video to support adding users can be found [HERE](#).

Step 2: Complete registration by following the link in your email
After being added as a user, you will receive an email to complete your profile set up. This must be completed in order to access training assets.

Step 3: Navigate to EDGE Academy to see all available courses, or jump straight to certification
You can always access EDGE Academy by going to solaredge.com, or you can use the direct links below!

The following courses are required for Energy Bank Certification:
[SolarEdge Fundamentals Training](#) (Duration: 1.5 hours)
[Energy Hub Technical Essentials](#) (Duration: 2 hours)
[Energy Bank Technical Certification](#) (Duration: 2 hours)

Step 4: Take final exam and receive certificate
After passing the final exam with 80% or better, you will receive a printable certificate of completion and your certification will be recorded in your EDGE Academy transcript.

You're now certified to purchase and install the SolarEdge Energy Bank!
Need additional support? Watch this [quick video](#) for more details in navigating EDGE Academy
